Re: Comprehensive Safety Analysis 2010 Initiative
Federal Motor Carrier Safety Administration
Docket No. FMCSA-2004-18898 - 22
FMCSA-1998-3639 - 37

Dear Sir or Madam:

ABC is one of the largest dealers of motor coaches in the country. As such we have an interest in the safety of the motor coach industry. ABC understands that there is a lack of uniformity and standardization for reporting of accidents and violations. ABC believes that safety in the industry can be increased by: (1) developing a standardized form and procedure for reporting accidents and violations; and (2) timelier follow-up by the FMCSA upon notice of cancellation of insurance, or other revocation orders.

Thank you for your consideration.

Sincerely yours,

ABC BUS COMPANIES, INC.

Ron Cornell
President & CEO
